

Task Management Project

The task management system provides managing tasks for employees.

Login Page

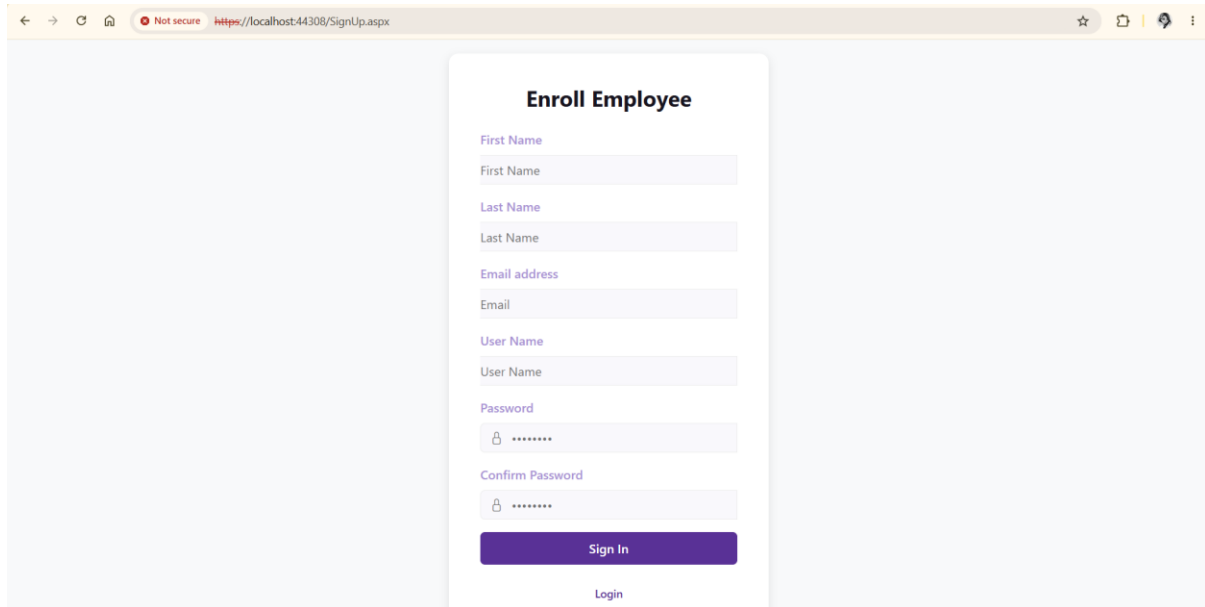

At first, we have the **Login page**, where the user needs to provide a username and password. If the user does not have an account, we provide an option to **create a new employee account**

The screenshot shows a web browser window with the address bar displaying "https://localhost:44308/Login.aspx". The page content is a login form titled "Login". The form has two input fields: "Email address" with the text "Lima" and "Password" with masked characters "***". Below the fields is a purple "Login" button. At the bottom of the form, there is a link that says "Don't have an account? Create New Account".

Enroll /Register Employee

This page allows a new employee to create an account. A **“Login”** link at the bottom redirects existing users to the login page. When the form is submitted, the frontend validates the entered details and sends the employee registration data to the backend **Web Method**, which validates the information and saves the employee details in the database.

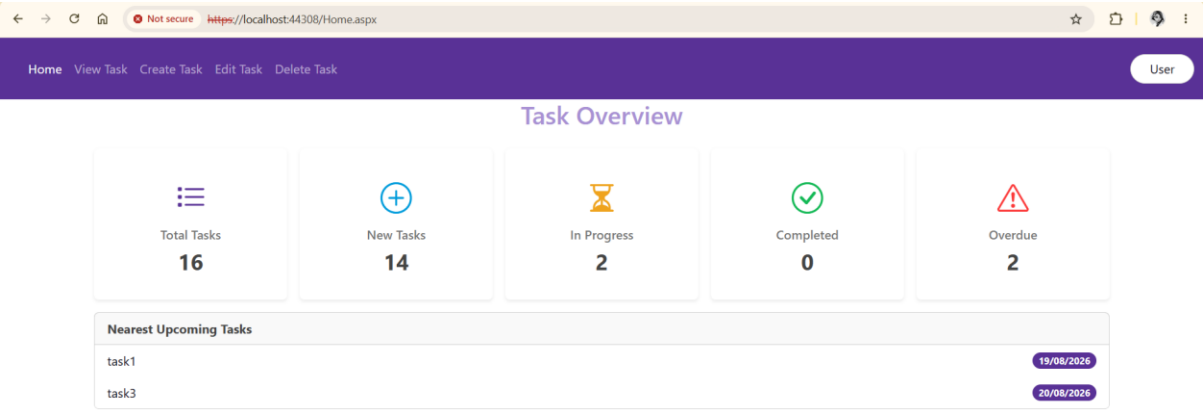

The screenshot shows a web browser window with the address bar displaying "https://localhost:44308/SignUp.aspx". The page features a central white card titled "Enroll Employee" on a light gray background. The card contains the following fields and elements:

- First Name**: A text input field with the placeholder "First Name".
- Last Name**: A text input field with the placeholder "Last Name".
- Email address**: A text input field with the placeholder "Email".
- User Name**: A text input field with the placeholder "User Name".
- Password**: A password input field with a lock icon and masked characters "*****".
- Confirm Password**: A password input field with a lock icon and masked characters "*****".
- Sign In**: A prominent purple button.
- Login**: A text link located below the "Sign In" button.

Task Management Dashboard

The dashboard acts as the main landing page after log-in, giving the user a quick summary of their task workload and upcoming deadlines. The Nearest Upcoming Tasks section displays the next tasks along with their due dates. Users can navigate to the respective pages to view, create, edit, or delete tasks. The dashboard is configured to display tasks based on the currently logged-in employee/user.

View Task

This page provides a centralized interface for viewing, searching, and navigating through assigned tasks. A search field allows users to filter tasks based on the available table data. The table also supports pagination, allowing users to navigate through multiple pages of task records

View Task

Show 5 entries

Search:

SI No	Task Name	Task Description	Status
1	task1	ee	New
2	task3	sabari krishnan	New
3	task1	fhrth	New
4	task2	wret	New
5	task2	trt	Inprogress

Showing 1 to 5 of 16 entries

Tables are Used

CREATE TABLE Employee (

Emp_Id VARCHAR(50) NOT NULL PRIMARY KEY,

```
Emp_FirstName VARCHAR(100) NULL,  
Emp_LastName VARCHAR(100) NULL,  
Email_Id VARCHAR(150) NULL,  
IsActive VARCHAR(1) NULL,  
CreatedDate DATETIME NOT NULL DEFAULT GETDATE(),  
password VARCHAR(255) NULL,  
userName VARCHAR(100) NULL  
);
```

```
CREATE TABLE PriorityMaster (  
    Priority_Id VARCHAR(10) NOT NULL,  
    IsActive VARCHAR(2) NULL,  
    CONSTRAINT PK_PriorityMaster PRIMARY KEY (Priority_Id)  
);
```

```
CREATE TABLE Status (  
    Status_Id VARCHAR(10) NOT NULL,  
    Status_Name VARCHAR(10)  
    IsActive VARCHAR(2) NULL,  
    CONSTRAINT PK_Status PRIMARY KEY (Status_Id)  
);
```

```
CREATE TABLE TaskMaster (  
    Task_Id VARCHAR(50) NOT NULL PRIMARY KEY,
```

```
Task_Name VARCHAR(150) NULL,  
Task_Des VARCHAR(2000) NULL,  
Task_Status VARCHAR(10) NULL,  
Emp_Id VARCHAR(50) NULL,  
DueDate DATETIME NULL ,  
CreatedDate DATETIME NOT NULL,  
CompletedDate DATETIME NOT NULL,  
IsActive VARCHAR(2) NULL  
);
```

Insert Query

```
INSERT INTO Status (Status_Id, Status_Name, IsActive) Values  
('1','New','Y')
```

```
INSERT INTO Status (Status_Id, Status_Name, IsActive) Values  
('2','InProgress','Y')
```

```
INSERT INTO Status (Status_Id, Status_Name, IsActive) Values  
('3','Completed','Y')
```

```
INSERT INTO Status (Status_Id, Status_Name, IsActive) Values  
('4','Cancel','Y')
```

```
INSERT INTO PriorityMaster (Priority_Id, Priority_Name, IsActive) Values  
('1','Low','Y')
```

```
INSERT INTO PriorityMaster (Priority_Id, Priority_Name, IsActive) Values  
('2','Medium','Y')
```

```
INSERT INTO PriorityMaster (Priority_Id, Priority_Name, IsActive) Values  
('3','High','Y')
```

```
INSERT INTO PriorityMaster (Priority_Id, Priority_Name, IsActive) Values  
('4','Critical','Y')
```

Sequence

```
CREATE SEQUENCE Employee_Sequence
```

```
